

# KCRC West and East Rail Projects

Hong Kong

**Completion Date:**  
2001

**Client:**  
Kowloon Canton Railway Corporation

**Service Provided:**  
Support of Project Sponsors and Contractors

KCRC is currently engaged in expanding its rail network by the addition of the 30 kms West Rail from Nam Cheong in West Kowloon to Tuen Mun in the West New Territories and by the three new extensions to the existing East Rail. These are the Tsimshatsui extension from the Hung Hom terminus, the 10 kms rail link from Tai Wai to Ma On Shan and the 7 kms spur line from Sheung Shui to Lok Ma Chau.

Maunsell provided construction planning and programming support to KCRC for the East Rail extensions and to their consultants for two of the Technical Studies and for two of the detailed design consultancies. For West Rail, Crow Maunsell provided prequalification and tendering support to several contractors and is providing Engineer Designate support to a detailed design consultant for a section of the project.
